## Claresholm As An Educational Centre

Brief Sketchs of the Members of the Staffs of the Claresholm School of Agriculture and the Claresholm Public School.

### Interim Work of the Staff of the School of Agriculture

In the House this week at Edmonton, Hon. Duncan Marshall, minister of agriculture, in speaking of the schools of agriculture, stated that there were four teachers at each of the three schools. They were men selected for their fitness, and their services were at the disposal of the department of agriculture for twelve months of the year. The school work occupied their attention only six months annually. The rest of their time would be taken up with extension work and other duties, such as the teaching of agriculture to the public school teachers of the province at the summer schools. Research work would also be instituted. The province would thus benefit by the continuous service of twelve skilled agriculturists whose work would be of incalculable assistance in the province.

W. J. Stronach, B.A., B.S.A., Principal of the Claresholm School of Agriculture and Instructor in Field Husbandry.

W. J. Stronach, B.A., B.S.A., the principal of the Claresholm Agricultural School, has the advantage of being a graduate in agriculture. He was born and raised in agriculture. He was early educated and received his early education in Oxford, Ont. and took his secondary education at the Collegiate Institute in St. Mary's, Ont. After attending model school in Stratford, he taught as principal of the Bolton Public School for three years. He next took an honor course in chemistry and mineralogy in the University of Toronto, where he obtained a Bachelor of Arts degree in 1909. The same year he was inspector for the Toronto City Dairy, and in the spring of 1910, graduated in pedagogy from the Faculty of Education, Toronto. Later he attended the Manitoba Agricultural College and completed four years' standing there in March of 1911, when he was appointed principal of the High School at Burk's Falls, Ont. At the

end of three months he resigned to accept the position of science master in Stratford Collegiate Institute. He returned west in the spring of 1912 and spent the summer farming in Saskatchewan, and during this time did considerable judging of livestock at the summer fairs in that province. That fall he returned to Manitoba Agricultural College to complete his studies. Just before coming to Claresholm last July, he was engaged by the Manitoba provincial department of education to arrange for the introduction of agricultural instruction into the high schools of that province.

P. M. Abel, B.S.A., Instructor in Animal Husbandry.

Mr. P. M. Abel who will have charge of the Animal Husbandry course is a South American by birth, and received his elementary education in Boston, Mass. From the public school he went to the Rindge Technical High School in Cambridge, Mass. at Harvard University. The many opportunities for study that this old seat of learning affords, first awakened an interest in biology and animal life investigation, which he has since made his special line of study.

Coming to the Regina district in Saskatchewan in 1906, Mr. Abel worked on farms and ranches until last year. Finding prospect so attractive that in 1908 he entered Manitoba Agricultural College, receiving his degree from Manitoba University after completing the regular five year course. Fortune favored him all through his course at Winnipeg. In the first and second year both scholarships offered by the Province of Saskatchewan fell his way, and in the final year, besides winning the Lieutenant Governor's gold medal for highest all round standing, he headed the Canadian students at the Chicago stock judging competition. Mr. Abel's experience in judging at fairs, and lecturing at farmers' short courses in Manitoba will be put to account in extending the influence of the Claresholm School beyond the borders of the province.

MORTIMER W. SHEPHERD, Instructor in Farm Mechanics.

Mr. Mortimer Shepherd, in charge of the department of Farm Mechanics was born at Boston, Mass., and attended the public schools of that city until the age of twelve years, when his family came West and settled on a large tract of land at Fremont, Indiana. Mr. Shepherd attended the public schools, at the same time trying to obtain thorough knowledge of farming. He attended Hillsdale College, Hillsdale, Mich., was Principal at Pittsford, Mich., and a student at the State Normal College at Ypsilanti, Mich. one year, retaining the next year as teacher of History. He was Principal again at Pittsford, and a student at Columbia University, a teacher's college.

After finishing at Columbia, he obtained the position of Supervisor of Manual Training at Providence, R.I., where he remained three years, visiting England and other countries in Europe, studying and observing. A few months at the Guilds School in London proved to be useful and interesting. During this year Mr. Shepherd finished the course in ship at Nas, Sweden. This course consists of useful articles entirely made by hand for the house and farm.

The next position Mr. Shepherd obtained was in the Chicago Manual Training High School, as teacher of pattern making. During this year, he was elected Supervisor at Milwaukee, Wis., and remained two years in this position, but resigned to become head of a manufacturing company.

After some years spent in practical work, a fine position in school shop and supervisor at St. Charles, Ill., was accepted by Mr. Shepherd. The next position was Director of Shops at the James Mulgrew University at Decatur, Ill., after which he was for two years Supervisor at Riversdale, Ill.

JAMES C. HOOPER, M.A., Instructor in English and Elementary Science.

Mr. J. C. Hooper was born at Picton, Prince Edward County, Ontario

and received his early education in the Picton Collegiate Institute where he obtained Honor Matriculation and Senior Leaving certificates.

Before beginning his University course, he taught for a few years in the Continuation School at Black River Bridge, Ontario, which is one of the best mixed farming districts in Ontario.

He then entered Queen's University and in 1909 he obtained his M.A. Science Specialist Degree, specializing in botany, and animal biology. In his third year, he secured the scholarship in Chemistry, and in his final year won the Gold Medal in biology. He also holds a permanent High School certificate.

After graduating from Queen's University, he obtained a position on the teaching staff of the Manitoba Agricultural College, in the biology department where he remained for several years. While in this position he obtained a valuable knowledge applied to farm practice of botany, bacteriology, entomology and zoology. He has had much practical work on Legume bacteria, and has sent out to the farmers of Western Canada, cultures for inoculating alfalfa and red clover seed.

In addition to the regular work, he has given careful attention to nature study and has made collections of the plants and economic insects of Western Canada.

Mr. Hooper comes to the School of Agriculture at Claresholm with a practical knowledge of science applied to Western Agriculture.

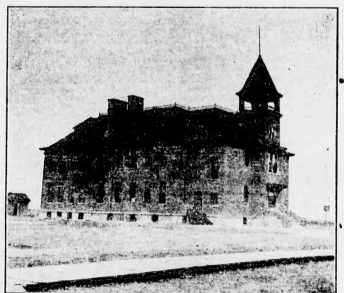

MISS M. GOLDIE, Instructor in Household Science.

With the realization of the tremendous power that a strong house hold science course could exert in aid of rural uplift, the Minister of Agriculture considered long and closely when Miss M. Goldie was asked to assume the responsibility devolving on the head of the department.

Miss Goldie is a Canadian by birth and education. Prior to entering college, she held a well ground work for future scientific education in the public and high schools of her native town, Guelph, Ontario. Her highly creditable standing upon graduation from McDonald Institute induced her to take up post graduate work along the lines of flour testing and bread baking. This training brought her into immediate contact after leaving the Ontario Agricultural College. Her first line of endeavor was lecturing to the Women's Institutes in the Province in cooking. After this Miss Goldie was elected to take charge of the household science department of an Eastern school, where, along with regular school work, she obtained valuable experience in teaching older students in industrial classes.

Should the people of Southern Alberta respond to the household science course as indicated, part of the effort to get a teacher of Miss Goldie's calibre will be well repaid.

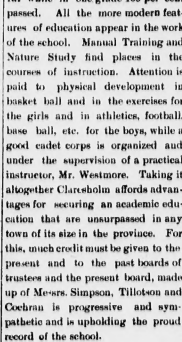

(continued on page 4)

### Our Present and Our Future Boast and Pride

In this issue we are introducing to the people of Claresholm and district the splendid body of educationists in the two schools of which we, as citizens, are so proud. We are giving the pictures, as far as we could obtain these, and a little sketch which is a partial introduction to the people of the teachers on the staff of the Agricultural School and of the Claresholm Public and High School. The latter has been with us longer and its successes, repeated each year, have become an old story, but an old story if it be a good story, will always bear repeating. We are as proud of the achievements of the Public School as we expect to be of the successes of the Agricultural School. In this issue we are giving a very good picture of the Public School building. We have one of the finest school plants in the province. A most competent and efficient staff conducts the student from the primary grade to the grade XI, fitting for matriculation to university or for Second Class Teachers' certificate. The Inspector's reports show the school to be well disciplined and the administration to be first-class. The results of the examinations, when compared with the results in other schools of the province, justify our pride in our teaching staff and in our pupils.

At the departmental examinations last summer over 96 per cent of the candidates from our school were successful while in one grade 100 per cent passed. All the more modern features of education appear in the work of the school. Manual Training and Nature Study find places in the courses of instruction. Attention is paid to physical development in basket ball and in the exercises for the girls and in athletics, football, base ball, etc. for the boys, while a good cult corps is organized and under the supervision of a practical instructor, Mr. Westmore. Taking it altogether Claresholm affords advantages for securing an academic education that are unsurpassed in any town of its size in the province. For this, much credit must be given to the present and to the past boards of trustees and the present board, made up of Messrs. Simpson, Tillotson and Cochran is progressive and sympathetic and is upholding the proud record of the school.

MISS A. R. McRAE, Vice-Principal of the Public School. Vice-Principal Miss A. R. McRae has charge of the Upper Public School grades and teaches in the High School (continued on page 4)

J. SCODFIELD, B.A., Principal of the Public School.

Mr. J. Scodfield, Principal of the Public School, is a native of Bruce County, Ont., and a graduate of Owen Sound Collegiate Institute. In 1909, he graduated with honors in Modern History from Toronto University. The golden west attracted him and in that year he came to Calgary and entered the Normal School there. On graduating, he taught five months in Lundbreck, Alta., then accepted a position on the Calgary Practice staff. There he remained until March, 1912, when he accepted the principalship of the school in Claresholm. Mr. Scodfield's work in the High School here speaks for itself in the splendid results of the examinations. Our percentage of pupils passed rank among the highest in the province. He has ever a cheering word or a helpful suggestion for the members of his staff, and is held in highest esteem by them and by the community at large.

MISS A. R. McRAE, Vice-Principal of the Public School. Vice-Principal Miss A. R. McRae has charge of the Upper Public School grades and teaches in the High School (continued on page 4)

## METALLIC CARTRIDGES

Whether your arm is a Remington or any other standard make, whatever its calibre and the load you need, you want Remington-UMC metallic cartridges because they are necessarily stamped with the name of your firearm, but because they give more accurate results. This company has been making ammunition for fifty years. We produce metallics for every standard make of arm—and every Remington-UMC cartridge is tested in the same way that it is made.

Now every hunter and sportsman should have a Remington-UMC cartridge in his pocket when he goes hunting. It is the only cartridge that will give him the most accurate results.

Remington-Union Metallic Cartridge Co., Windsor, Ontario.

## Life is Uncertain

—the life of a wooden tub or pail.

## POTTED MEATS—

Full flavored and child's perfectly cooked delicat. The pickler's choice. Everybody's favorite.

W. CLARKE, M.P., Montreal.

### Very True

Lodger—But you advertised that one could see for miles from this town!

Landlady—Well, so you can. You can see the moon through the skylight, and that's what miles away.

James, said the efficiency expert, annoyed by the cheerful but which his chauffeur had of whitening while he works, you should remember that the most fortunate nowadays are made from the by-products of the Heretofore when you whistle, whistle in the air and save the expense of a pump.

A Safe Pill for Butters—There are pills that violently purge and fill the stomach and intestines with bile. Remo's Vegetable Pills are mild and effective. They are purely vegetable, no mineral purgative, entering into their composition and their effect is soothing and beneficial. Try them and be convinced. Thousands can attest their great curative qualities because thousands owe their health and strength to timely use of this most excellent medicine.

Mr. Brown—My husband lost a great deal of money on that decline in stocks.

Mr. Jones—I am so sorry. Whenever I hear of those declines in stocks I think wouldn't it have been a thing if everybody had sold out before the market began to go down.

John, dear, I want to ask you a question. You would answer me truthfully, wouldn't you?

Yes, dear, what is it?

If you had never met me, you'd have loved me just the same, wouldn't you?

John—Ah—er—his—kin I marry your daughter, Mr. Jones?

Mr. Brown—Well, young fellow, have you got any references from your former father-in-law?

John—No, sir.

Mr. Brown—Well, young fellow, have you got any references from your former father-in-law?

John—No, sir.

Mr. Brown—Well, young fellow, have you got any references from your former father-in-law?

John—No, sir.

Mr. Brown—Well, young fellow, have you got any references from your former father-in-law?

John—No, sir.

Mr. Brown—Well, young fellow, have you got any references from your former father-in-law?

John—No, sir.

Mr. Brown—Well, young fellow, have you got any references from your former father-in-law?

### WHAT IS THUNDER?

A Simple Explanation of the Thunder Canopounding in the Sky.

What is thunder? It is a perfectly light paper bag until it is full. Hold the paper bag so that the air can escape and strike it sharply and suddenly. There will be an explosion like the crack of a gun.

That is what thunder is! A simple explanation of the thunder canopounding in the sky. It is the explosion, compression and sudden escape of air. It is the same thing that we do when we blow a whistle. In fact, the really simple explanation of thunder than the paper bag experiment is that it is the explosion, compression and sudden escape of air.

The spark caused by the cap causes the ignition of the powder. The powder pushes the bullet out of the barrel of the gun and when gas comes in contact with the air, it makes a roaring, crackling sound trying to get through, because the pressure of the gas is greater than the air. It is the result of the lightning.

Now, what is lightning? We don't know. Nobody knows. We know that it is electricity—which is another way of saying that we don't know because we don't know what electricity is. But we do have a general idea of what lightning does to make the thunder. There is electricity in the air all the time. Sometimes we feel it more than we do at other times. It is more so when it is raining. It is more so when it is raining. It is more so when it is raining.

But it is not much of a breeze so the air feels heavy and oppressive and seems to be filled with moisture. It is filled with tiny particles of water which are so small that they are not visible to the eye. They are so small that they are not visible to the eye. They are so small that they are not visible to the eye.

These droplets are curious things. They are so small that they are not visible to the eye. They are so small that they are not visible to the eye. They are so small that they are not visible to the eye.

These droplets are curious things. They are so small that they are not visible to the eye. They are so small that they are not visible to the eye. They are so small that they are not visible to the eye.

### Had Her Own Way

It was a sunny day, and the florist's window, full of gaily-decked flowers, looked unusually seductive.

Soon there entered a lady of attractive appearance, but with a certain firmness of expression, indicative of a disposition to have her own way.

She selected a brilliant bouquet, placed in a Japanese flowerpot, and having ascertained the price and announced that she would take it, inquired if it would do well in the summer.

Certainly, said the florist's assistant. "Don't say it will if it won't, she remarked, sharply. Now, if it grows well in the winter, will the shade hurt it?"

"Not in the least, mum, responded the assistant."

Ah, she said, with a tightening of the lips; here is a plant that is declared to do equally well in shade or sunlight, will you please take it, in lieu of natural sun or shade."

And then the lady, having said her piece, went out, with a flushed face, and shut the door with a slam that surely shook the place.

### NERVOUS CHILDREN

ARE OFTEN IN THE EARLY STAGES OF ST. VITUS DANCE

They Need a Tonic to Strengthen the Weak Nerves and Restore Them to Natural Health

Many a child has been called awkward, has been punished in school for not keeping still, or for dropping things, while the real cause is a nervous condition. This is the case with St. Vitus dance in its earlier stages. No common tonic in this nervous condition will do it. It is a disease of the nerves, and it is a disease of the nerves. It is a disease of the nerves.

It is a disease of the nerves. It is a disease of the nerves. It is a disease of the nerves. It is a disease of the nerves. It is a disease of the nerves. It is a disease of the nerves. It is a disease of the nerves.

## THE NEW THOUGHT EDUCATION

EDUCATION

The theme of educational thought and research to-day is pre-vocational or industrial education. Recently there met in the city of Grand Rapids

Mich., the National Society for Promotion of Industrial Education and last Sunday in all the pulpits of that city addresses and sermons were delivered with this special subject as the centre of their thought. Hon. J. R. Boyle, minister of education for this Province in the course of an address to the legislature said, "It is recognized to-day that the training of the hand and eye is important as the training of the mind, and with out neglecting the cultural side, and its integration to develop the technical side of education." Later in reply to a question of the member for Rocky Mountain constituency, the minister informed him that the money to be devoted to technical education would not be confined to the cities, neither would it be devoted entirely to agriculture. The question of technical education for miners would receive the most careful consideration. In regard to agricultural education, in the province, Mr. Boyle outlined the intentions of the department. It was planned to teach elementary agriculture in the rural schools of the province and for the purpose summer training schools for teachers were started this year, 120 teachers would take this course and so it themselves to teach elementary agriculture in the rural schools.

In the schools of Calgary a recent investigation showed that out of 320 answers to the question of the choice of a life work, only 103 had chosen occupations such as teaching, professions, medicine, law, civil engineering, etc. which the present curriculum was properly suited. For the balance no definite training was afforded in the public or high schools. Night classes were opened in some of the Calgary schools a week or so ago with an overflow attendance. Classes in bookkeeping and advanced arithmetic, in mechanical drawing and in bookkeeping, etc., attracted many students. The shorthand class taxed the accommodation. These are evidences that the thought is aroused and that educationists are following the gleam and that as time advances some mighty upheavals will take place in the old ideas of education. This is pre-vocational education, though largely confined to agriculture, that is following in the government system of agricultural schools.

Miss Nana Lawson's

Assistant in Household Science.

Miss Nana Lawson was born at Inverness, Scotland, and while very young, her parents decided to come to Western Canada and become pioneers in the building of our great Canadian West. Her first home was

in Winnipeg and later, her parents decided to make Calgary, Alberta, their permanent home.

Miss Lawson received her early education in the Calgary Collegiate Institute, where she proved her worth as a very capable and energetic student, and where she obtained her Honor Matriculation.

She then chose to take her college course at the State Normal School of Manual Arts and Home Economics at Santa Barbara, California, which is regarded as one of the best Home Economics Schools in America, and where Honor Matriculation is required to enter. Throughout her college course she maintained her high standing as a student and was successful in securing honors in Dressmaking and Millinery.

After graduating from the State Normal School, she was chosen to fill a position on the staff of the Public and High Schools of Santa Barbara, where she received a valuable experience in teaching domestic science and domestic art.

Miss Lawson's splendid training and her practical experience makes her a valuable acquisition to the staff of the Clareholm School of Agriculture.

Home of Scientific Agricultural Education Is Almost Ready

The agricultural school building is completed, the interior finished, and the fixtures are being set up. Ascend the flight of broad concrete steps and enter the wide hall. On the left are the business offices of the principal. Farther down the hall on the same side is the room which will be the laboratory when the equipment is set up. On the right side of the hall, a commodious class room awaits the students. Desks are already in place and this bright, cheerful room will, in a few days, be filled with eager students who will toil for the best work of the teachers in whose hands these students are placing themselves to be trained and equipped for life work. On this floor is also the library. Upstairs the domestic science mistress will reign. Her office and a sewing room and the rooms which will be used for domestic science instruction and for the classes in actual practical cooking, with a large classroom on the north side for girls, are on this floor. The third floor is the spacious assembly room where the more relaxing part of the curriculum, the social and school functions, will be enjoyed. The building is heated throughout by the steam heating plant in the basement and gas is being installed as rapidly as possible. This will be invaluable in the domestic science manual instruction. A large room in the basement will, for this winter, be used for livestock judging and kindred subjects on the curriculum while another room is devoted to dairy instruction. Every convenience is provided for the students to ensure their happiness and health. The whole staff are busily engaged in preparing the school for opening on the 29th. A class of over 75 is expected, as 50 have already applied for admission.

The third floor is the spacious assembly room where the more relaxing part of the curriculum, the social and school functions, will be enjoyed. The building is heated throughout by the steam heating plant in the basement and gas is being installed as rapidly as possible. This will be invaluable in the domestic science manual instruction. A large room in the basement will, for this winter, be used for livestock judging and kindred subjects on the curriculum while another room is devoted to dairy instruction. Every convenience is provided for the students to ensure their happiness and health. The whole staff are busily engaged in preparing the school for opening on the 29th. A class of over 75 is expected, as 50 have already applied for admission.

(continued from page 1)

Miss Nana Lawson's

Assistant in Household Science.

Miss Nana Lawson was born at Inverness, Scotland, and while very young, her parents decided to come to Western Canada and become pioneers in the building of our great Canadian West. Her first home was

in Winnipeg and later, her parents decided to make Calgary, Alberta, their permanent home.

Miss Lawson received her early education in the Calgary Collegiate Institute, where she proved her worth as a very capable and energetic student, and where she obtained her Honor Matriculation.

She then chose to take her college course at the State Normal School of Manual Arts and Home Economics at Santa Barbara, California, which is regarded as one of the best Home Economics Schools in America, and where Honor Matriculation is required to enter. Throughout her college course she maintained her high standing as a student and was successful in securing honors in Dressmaking and Millinery.

After graduating from the State Normal School, she was chosen to fill a position on the staff of the Public and High Schools of Santa Barbara, where she received a valuable experience in teaching domestic science and domestic art.

Miss Lawson's splendid training and her practical experience makes her a valuable acquisition to the staff of the Clareholm School of Agriculture.

Home of Scientific Agricultural Education Is Almost Ready

The agricultural school building is completed, the interior finished, and the fixtures are being set up. Ascend the flight of broad concrete steps and enter the wide hall. On the left are the business offices of the principal. Farther down the hall on the same side is the room which will be the laboratory when the equipment is set up. On the right side of the hall, a commodious class room awaits the students. Desks are already in place and this bright, cheerful room will, in a few days, be filled with eager students who will toil for the best work of the teachers in whose hands these students are placing themselves to be trained and equipped for life work. On this floor is also the library. Upstairs the domestic science mistress will reign. Her office and a sewing room and the rooms which will be used for domestic science instruction and for the classes in actual practical cooking, with a large classroom on the north side for girls, are on this floor. The third floor is the spacious assembly room where the more relaxing part of the curriculum, the social and school functions, will be enjoyed. The building is heated throughout by the steam heating plant in the basement and gas is being installed as rapidly as possible. This will be invaluable in the domestic science manual instruction. A large room in the basement will, for this winter, be used for livestock judging and kindred subjects on the curriculum while another room is devoted to dairy instruction. Every convenience is provided for the students to ensure their happiness and health. The whole staff are busily engaged in preparing the school for opening on the 29th. A class of over 75 is expected, as 50 have already applied for admission.

the superintendent's house. There will also be erected soon a stock judging pavilion to the south of the school and somewhat to the east. The remaining portion of the ground adjoining the school on the east and south will be occupied by demonstration and experimental plots. Every thing points to the practical and at the same time scientific, nature of the instruction which the students will be given.

(continued from page 1)

work. Miss McEneaney was born in

Chatham, N. B. where she took her

High School work. Then she graduated with a Superior Certificate from the Normal School of Fredericton, N. B.

Five years ago Miss McEneaney came west and after teaching for four years at Magrath and Raymond she accepted a position on the Clareholm staff in September 1912. Miss McEneaney's work here has met with excellent and well-deserved success. One hundred per cent of the candidates from her room being successful in the midsummer examinations. The secret of her success lies in a general personality and an earnestness in her work which naturally inspires her pupils but affects all who come in contact with her.

Miss L. M. GARDIN

Teacher of Grades V and VI.

Miss L. M. Gardin who has charge of Grades V and VI in the school of the Brandon Collegiate Institute, and also of the Calgary Normal School. Since coming to Clareholm in August 1912, her bright, cheery disposition has won the esteem and love of her pupils but of her fellow teachers as well. Although not long engaged in the teaching profession her work with Grades V and VI has met with splendid satisfaction, not only to the School Board but to the Inspector as well. One of the strong features of Miss Gardin's work is the attention given to her grades in actual training, practical work and drawing. These are subjects which up to this teachers have not accorded neglect these days.

Miss L. G. M. RAY

Teacher of Grades III and IV.

Miss L. G. McEneaney, of Chatham, N. B., is a graduate of the Fredericton Provincial Normal School. She came west at midsummer and is in charge of the work in Grades three and four. Although Miss McEneaney spent but two months with us she has not only won the love and confidence of her pupils but is being highly esteemed by her fellow teachers.

Miss LANA M. TONG

Teacher of Grade III.

Miss Lana M. Tong, our teacher in Grade III, graduated from Brandon High School. She came west in 1908 and after taking a course in Calgary Normal began her duties here in 1909 when the school was inaugurated. Miss Tong is a most progressive teacher and her enthusiasm in her work, the interest she arouses in her pupils and the good results she obtains from her work, that little used by other teachers. The children who have Miss Tong for their teacher are not busy looking excuses to remain away from school.

Miss Ruth DAVIS

Teacher of Primary Department

Miss Ruth Davis, our Primary teacher received her higher education at Belleville High School and Toronto Normal School. She came west in 1908 and after taking a course in Calgary Normal began her duties here in 1909 when the school was inaugurated. Miss Davis is

Admission \$1.00

P. S.—On the occasion of the last visit of the Hallowell Co., those who were fond of dancing had the delightful experience of dancing to the music of one of the finest orchestras in the land. The Knights of Pythias have arranged for another such delight on Nov. 4th.

## Claresholm and District

J. Dougan has been appointed junior of the Agricultural School.

Mrs. Thos. Ellison was a Claresholm visitor on Wednesday.

Geo. F. Carey was in Calgary on business on Tuesday.

D. E. Carjill, of Clarkson, Wash. is here this week.

J. G. Evans and nephew leave on Monday for Wales.

Tin Cochlin, of Granum, was in town on Tuesday.

John L. Edlund paid Calgary and Nanton business visits this week.

Miss Shand spent Thanksgiving at her home in Lethbridge. Miss West and Peter Grey were her guests.

Mrs. H. Wright and Miss C. G. Wright were Calgary visitors on Saturday.

Miss Little Wood spent Thanksgiving with her parents in Lethbridge.

P. M. Abel, of the Agricultural School staff, was a judge of livestock at the Grassy Lake Fair.

Mrs. J. W. Treman, of Neepawa, is visiting her daughter, Mrs. L. A. Parry, this week.

Miss Nan Lawson, of the Agricultural School staff, spent her Thanksgiving holiday at her home in Calgary.

Mr. and Mrs. R. M. Larkin spent the holiday with the latter's sister in the Hills.

J. F. Miller, of Vernon, B. C., a former manager of the Union Bank, was in town on Monday.

J. A. Gaulin returned on Tuesday from a business trip to Treherne and other Manitoba points.

FOR SALE—One large heater, as good as new. Apply to A. E. Thompson, C. P. R. agent.

Harry Bell, of Cote & Bell, former proprietors of the Wilton Hotel here, now of the Oval Hotel, Calgary, is in town to day.

Mr. and Mrs. W. E. Wallin and Mr. Buckner, of Banff, were the guests of Mr. and Mrs. J. E. Moffatt on Thanksgiving Day.

Mr. Sholver, of Dakota, who was sent one time a business partner of O. J. Amundson and a joint owner with him of the tonnage, is in town this week.

Entrapped in a burning pit at Seoughdale, South Wales, 436 coal miners perished in the worst mine disaster in the history of the British Isles.

The tonnage of Empress, a divisional point on the Swift Current-Bossom cut-off, will be offered by sale at auction by the C. P. R. at Medicine Hat on November 6th.

Last Saturday's cash prices in store at Port William were: Wheat, No. 1 Northern, 75c; No. 2, 76c; Oats, No. 2 C. W., 32c; No. 3, 31c; Barley, No. 3, 41c; No. 4, 38c.

FOR SALE—I have a quantity of Western Grey Grouse, Seed, 25c a dozen. A No. 1. Apply to Freeman Anderson, 311 12 27, Claresholm, Alta. Phone R116.

The Ladies' Aid Society of the Presbyterian Church have taken in hand the renovating of the interior of the church. Work will begin next week.

A fire alleged to have been set by L. E. Wilton, resulted in the burning of a Win. Best and two were destroyed. The case was heard by C. W. James, J. P. and a civil suit will probably arise out of the matter.

Charged with obstructing an officer in the discharge of his duty, J. Campbell Brown, of Granum, were fined by C. W. James, J. P., yesterday. The case occupied the entire day.

The morning service at the Methodist Church next Sunday will be conducted by Mr. R. K. Peck and the evening service, which will be a song service, will be in charge of J. W. Hallatt.

BORN—On Tuesday, October 14th, to Mr. and Mrs. L. A. Parry, a son. There is claimed for this baby the distinction of being the second largest baby born in Claresholm. The infant weighed 11 1/2 lbs.

The two-year old son of I. C. Peterson, near Strathmore, secured a bottle of carbolic acid from which he drank and died in great pain. His mother had been giving him cough medicine which the boy seemed to like and it was this bottle which the child swallowed he had.

A nursery agent has been distributing a large number of trees among the farmers this week. This is an encouraging sign.

Mrs. W. T. Cochran had a short visit from her sister, Mrs. (Dr.) Stack pool, of Thirteenth, this week. Mrs. Stackpool, with her little daughter, arrived on Saturday and returned to Cardston on Tuesday.

The recent increases in the salaries of the cabinet ministers of the provinces which added \$1,000 a year to each salary, does no more than bring those salaries up to equal those paid the cabinet ministers of Ontario and British Columbia.

The discovery of oil at Black Diamond has stimulated the oil prospecting interest and oil rights are being laid upon in large numbers for a district near Lethbridge, for the Redcliff and the Medicine Hat territories and also for other districts in widely divergent parts of the provinces.

WANTED—A girl or boy to learn the printing business under a very capable printer of wide experience. Wages are generally better in the printing business than in most other trades. A bright girl can learn the compositor's end of the business very readily and can soon command very good wages. Apply, Review Office.

A meeting of those interested in having a skating rink here this winter is called for Friday, Oct. 24th, at 8 p.m. in the Wilton Hotel parlors. The meeting called for last Friday was so thinly attended as to dampen the ardor of the few who were present. If this second attempt does not meet with a better response Claresholm may be skatingless this year.

Some what unique was the decoration at the Methodist Church last Sunday, consisting of a design worked in bread. A crown in the upper centre with sheaves on either hand and the verse, "Thou convertest the year with loving kindness," underneath, was all worked out in bread. A ornamental border surrounded the verse, which was a credit to the local baker, E. G. Butler.

Rev. and Mrs. Sibley and daughter Mary, who have been visiting their parents at the Methodist parsonage, leave on Saturday for Vancouver en route to China. They are returning to Cheung-tu, province of Szechuan to resume the missionary work in which they have been engaged for some years. The journey to the interior of China will occupy the next three months.

Increased guarantees were given to the C. N. R. by the legislature at Edmonton this week with a view to relieving the credit of that company, so that it may proceed more rapidly with the construction of its branches in the southern part of the province. Premier Sifton gives the assurance that every pressure will be brought to bear to have the branch from Calgary to Macleod and also that from Macleod to Lethbridge completed by next year.

## Semi-Annual Meeting of Curling Club

A well-attended and enthusiastic meeting of the Claresholm Curling Club was held last Friday evening in the Council Chamber. Addressed with the Alberta branch of the Royal Canadian Curling Club, headed up by the president, the meeting decided to set out upon the annual tour of the season of \$10. The suggested formation of a league of the High River, Nanton, Granum and Claresholm clubs for the purpose of holding an annual tournament at each of those towns alternately met with favor. The appointment of skips was left over until a later date. The matter of securing services for the rink was left to the discretion of the president and secretary. Instructions were given for the marking of the ice for points comparison. The finances are in a very satisfactory condition.

## How Long Is the String?

Moffatt & Sons have decided to clean out their stock of crockeryware and to this end will give to every purchaser 30 cents worth of these goods on guess as to the length of a string which is hooked to a ring at their store. To the one coming nearest the correct length will be given an aluminum coffee percolator.

# BIG KEY CONTEST

New Williams Cabinet Sewing Machine  
Given Away Absolutely Free

Our proposition is this—

With every two dollar cash purchase bought in our store, you are entered to one key, four dollars two keys, and so on up. One of the keys in the box will open a large Yale lock. The person who secures this key will win the beautiful sewing machine.

The lock will be sealed and on display, so will the sewing machine. You will be proud to possess it, it costs you absolutely nothing.

We are prepared for a large volume of business, with a full line of the latest goods; our prices are right.

This contest is for the purpose of introducing ourselves to those who are not our regular customers and to show our appreciation of those we have had the pleasure of serving.

We will let our customers know when keys are all distributed.

Yours truly,

MARK FISHER,

General Merchant,

Claresholm, Alta.

## Get Ready for Cold Weather

We have

McClary's "Famous" Ranges  
"Monarch" Steel Ranges.  
Moffatt's "National" Stoves.

Guns, Ammunition and Shooters' Sundries

## Moffatt & Sons - Claresholm

Headquarters for Shelf and Heavy Hardware.

## Mission Circle Concert

The Excelsior Mission Circle of the Methodist Church are announcing a concert for the evening of Monday, October 27th. It is intended to add to the social enjoyment of the evening by serving light refreshments. The young ladies of the Circle will exert every effort to make the evening most enjoyable and from the success of these youthful hostesses in the past a very large attendance is expected. The program will be something out of the general order and strangers in the town will be heartily welcomed. A nominal admission fee will be charged of 25 cents for adults and 15 cents for children.

## Eclipsed All Previous Records

The Chicken Pie Supper at the Methodist church last Monday evening eclipsed all former efforts. Al-

though a much larger supply was prepared, every vestige of chicken disappeared under the onslaught of whetted appetites. It was a financial success as well, the proceeds amounting to \$100.00, the largest ever raised in the history of the church.

## Farewelled the Missionaries

On Wednesday afternoon a number of the ladies of the Methodist Church met at the parsonage to say Good-bye to Mr. and Mrs. Sibley, who leave on Saturday for China. At the conclusion of an interesting program, Mrs. Sibley was presented with a gold piece. Refreshments were served. During their short visit in Claresholm, Mr. and Mrs. Sibley have endeavored themselves to make whomever they met, while wishing them God speed in the great work in which they are engaged. They leave for the Orient on Saturday and will be away nine years.—Conc.

**Three Wives** In a churchyard an old man, deep in thought, sat on a flat rock. He had been talking, but all the trees looked front and end, and he was passing by, made a remark on the way.

"Good morning!" "Yes, said the old man. "Just the sort of weather to make things spring up, said the tramp. "Hush! hush! said the old man. I have three wives buried here."

"The flower under the ash-tree?" "Half dead, sir. "Cuckoo—yes, it did about five years ago."

**Justice is its Own Reward** The above is an adage that is seldom repeated by the finder of lost property when a substantial money consideration is involved in the restoration of the thing found, but an Oklahoma hunter who traced and found a little boy who had been lost for several days refused the reward of \$500 that had been offered for his child's return, the father's and mother's joy, he said, was reward enough for him.

Why, he heard better such a thing as a whole day. Because every day begins by breaking.

**DODD'S KIDNEY PILLS** are the best and most effective. They are made of the finest materials and are guaranteed to last for years. They are the best and most effective.

## Plinds Interest of Old Pioneer

An interesting discovery in connection with the early history of Canada, was made by the C.P.R. by Mr. John M. Gibson of the C.P.R. by Mr. James Brower, of the Hudson Bay Co. at Banff, who in the addition to having fifteen hundred acres of land in the C.P.R. in a section of the rocky mountain trail, the famous explorer, Sir George Simpson, the famous explorer and governor of the Hudson Bay Company and his aide, Sir John A. Macdonald. Sir George was the first man to make the voyage to the Canadian and Siberia round the world, a trip which took him sixteen months to complete, whereas the C.P.R. and Trans-Siberian Railway have now reduced the possible time to thirty days. Mr. Brower, it appears, has discovered the Simpson pass, leading to discover some trace of Sir George Simpson's historic passage by the grace of fortune he chanced to examine closely the under side of a fallen tree, and there on the Great Divide between Atlantic and Pacific found some carving which proved to be:

1841. It is evident that these initials are those of Sir George Simpson and his aide, Sir John A. Macdonald. The use of the initials "J." or the modern letter "J." was not used until the carving was executed by Sir George Simpson in the year 1841 is the fact which the famous explorer made his trip through the Rockies, choosing the pass which was named after him.

The carving is well preserved. The fact that the tree had suffered from that side to the ground and had suffered to protect the lettering against the weather. Mr. Brower had the half of the tree containing the carving cut and taken to the city of Montreal, where it is now on display in the city hall. The carving is well preserved and is a valuable addition to the history of the C.P.R. and the Hudson Bay Company.

**REST AND HEALTH TO MOTHER AND CHILD.** The French Renovation Therapy is a safe and effective method of treating all skin diseases, including eczema, psoriasis, and other skin conditions. It is a complete cure for all skin diseases.

## Marvellous Escapes

I was on the top floor of a skyscraper, said the first expert, expert, and a position where a fire broke out and cut off all retreat.

How did you escape? asked the second expert. "Well, I simply pushed a goose and so I got down."

Well, said number two, whose professional pride was hurt. It was once in a similar position. The escape was too short, and hundreds of people watched from the street, expecting every moment that the flames would reach me. But I did not mind the presence of a third, as they gazed up I walked down the stairs."

Myard's Liniment Co. Limited. Dear Sir:—I had a bleeding tumor on my face or a long time and tried a number of remedies without any good result. I was advised to try MINARD'S LINIMENT, and after using several bottles it made a complete cure, and it healed all up and disappeared. I am a grateful customer. DAVID HENDERSON, Belleisle Station, Kings Co., N.B., Sept. 17, 1904.

**A Good Trail** I am asking your conversationalist, she said. "Would you advise me to cultivate the habit, madam, cultivate the habit, he replied quickly.

**Matches and Fire Losses** On this continent, matches are everywhere. Every room contains matches and even every pocket of a man is full of them. They are scattered about on desks and in drawers and are so common and so handled so carelessly that it is not to be wondered that there is a great many fires resulting from their use.

**Love's Quick Ears** Love may be blind, but it isn't deaf. It always hears husband when he comes in late and talks over the side of the bed.

**Money?** Money? replied the captain, "I'm sorry as he continued his journey. The second gentleman a little further on addressed him. "How go pigro—this morning, captain?" he asked.

"They don't go at all—I carry 'em," was the unsatisfactory reply. Shortly after that the captain met the third gentleman, who having asked the time of day, casually inquired: "How much are pigroes a dozen, captain?"

"I don't know. I only bought a half-dozen," said the old gentleman, still plodding on his way. Finally, the fourth and last of the conversationalists attacked the weary old martinet by observing in the "hand-out" tone: "A fine lot of pigroes you have there, captain. What did you get them for?"

"To eat," was the emphatic rejoinder. The captain's eccentricity was henceforth left unchallenged.

**Useful in Camp—Explorers, surveyors, prospectors and hunters will find the Thompson's Compound very useful in camp. When the feet and legs are wet and the body is cold, the compound, freely with the Oil and the result will be the prevention of pain in the limbs, and the body will be kept warm and sprain be sustained, nothing could be better as a dressing.**

**He Needed It** A young dandy entered an outdoor shop recently and asked to be shown some eyeglasses. He was given a pair to try on, but finding them unsuitable, remarked: "What will you do since these don't suit me?"

"Well, I'll give you a stronger pair. "Then I'll give you a stronger pair. "And if they fail, said the dandy, what would you advise me to do?"

"Oh, maybe the frame is right; get an intelligent druggist and a good pair of eyes."

**No Flies on Ocean** Boston, it is claimed, has been freed from the fly nuisance by the simple plan of requiring the removal of manure from streets every day and the covering closely of all garbage cans. The result has been that the fly breeding-places are surely destroyed and more effective than waiting the fly after he has become large enough to require a waiting.

**March of Progress** Everything is for progress these days. We must get our church into the new age. All right. Shall we install a gymnasium in a parsonage?

"What a towel wringing out of cold water about your Lane here, then you go to bed at night. Cold water with dry hair and a nice warm blanket about the world. In the morning you know will feel all right."

Whenever you feel a headache coming on take **NA-DRUCO Headache Waters**. They stop headaches promptly and surely. Do not contain opium, morphine, phenacetin, acetanilid or other dangerous drugs. See a list at your Druggist. NATIONAL DRUG AND CHEMICAL CO. OF CANADA, LIMITED.

**Winnipeg Favors Concrete Lanes** Thirty thousand dollars will be spent by the Board of Control this year in concrete lanes. The use of concrete over a gravel foundation, and without any other top dressing, has become very popular. Many eastern and American cities of late years, and it is claimed that this style of roadway for suburban streets and lanes is the cheapest and best yet devised by the road-making engineers. Our lane in the rear of Kingsway was done in this way by the city early this spring and so far gives every promise of being entirely satisfactory.

Complete in itself, Mother Graves' Worm Exterminator does not require the assistance of any other medicine to make it effective. It does not fail to do its work.

Postmistress (to old woman)—You letter won't be. It's overweighed. And what is that, my dear? Postmistress—It's too heavy. You must put another stamp on it. Sure, it's joking you are. Another stamp would make it heavier than what it is already being given.

A prominent Boston attorney tells of an American tourist, hailing from the west who got a photograph in London. They took him aboard the old battleship Victoria, which was Lord Nelson's flagship in several of his most famous naval triumphs. An English sailor, enquiring of the American over the vessel, and coming to the table on the deck, he said, as he recently recalled his last trip to the west.

Here, sir, is the spot where Lord Nelson, he is killed; the westerner, "Oh, is it? Really? Well, that's not a very happy trip, on the whole, my dear."

Teacher—What is the force that makes the world move? Tommy—The landlady.

**ON BOARD THE CUNARD LINE MAURENTIA** On A deck. The names from left to right are: Mr. Thomas Royce (deputy chairman of the Cunard Company), His Majesty the King, Commander W. T. Turner, R.N.R. (Captain of the Mauretania), Mr. A. Booth (Chairman of the Cunard Company) and Her Majesty the Queen. In the second row to the right, may be seen Prince Alfred and Lieut. F. G. Brown, R.N.R. (Staff-Captain of the Mauretania).

Fourth day of October, 1933.

L. F. CLARRY,

Deputy Attorney General.

### The Minister of Agriculture's Announcement

"The Schools of Agriculture are being established especially for the education of the farmer's son and the farmer's daughter to better fit them for their business in life, that of agriculture. The main object of the instruction in these schools will be to give the students such knowledge and practice as will enable them to make farming a pleasant and a more profitable occupation. In the preparation of the course of study, the Board of Agricultural Education has kept the practical end in view, viz., the training of men for the actual practice of farming; nevertheless, it has not been forgotten that agriculture is a science and it is important that the men engaged in farming to-day should have a just class scientific training. Every progressive country in the world is recognizing the necessity of giving its boys and girls the best possible educational advantages as a preparation for what, even occupation in life they may follow. The government of the Province of Alberta in establishing these schools is recognizing that special educational facilities should be provided for that large proportion of the population which must naturally engage in this the greatest profession of the Province. To the assistance and co-operation of the farmers, however, the Schools of Agriculture will do a wider and more important work than simply giving instruction in a classroom. They can, and will, become centres where problems of soil and live stock are worked out; where experiments are tried; and theories proven or disproven; where by practical co-operation the farmers of the province may learn not only from their own experience, but from the experience of others as well. Since these schools are in a very special sense the institutions of the farmers of Alberta, the Department of Agriculture, as well as the Principals and Instructors in the schools, desire the assistance of every progressive farmer in the Province in making them the success which the agricultural possibilities of Alberta warrant.

### Return of Hallowells

The Hallowell Concert Company, made up ten real musical artists, which delighted such a large audience last March 1st here, are returning for the evening of Tuesday, November 4th. They are again under the auspices of the local Claresholm Lodge, Knights of Pythias. The reputation which this select company needs for itself is such that they do not need an introduction. Tickets will be for sale by members of the local lodge and the sale place is to secure your seats early.

## THE DOMINION BANK

DR. EDWARD G. O'LEARY, M.P., PRESIDENT. W. A. BATHURST, VICE-PRESIDENT.  
G. A. BOBERT, General Manager.

### The Business Of Farming

"Like the business of Manufacturing—should be done in a practical business way. Proceeds should be put in a bank. Payments should be made by Cheque. A certain percentage of the profits should be put in a Savings Account as an emergency fund. The man who has a cash surplus in a bank is protected against bad seasons and hard times."

CLARESHOLM BRANCH: SIDNEY DAWSON, Manager.
